## Computer Engineer

## Education

### School No.160 (2010 - 2021)

Baku, Azerbaijan

- Participated and reached final stage in National Programming Olympiad.

### Musical School No.2 (2013 - 2021)

Baku, Azerbaijan

- Twice a winner of Etude Contests.

### Bogazici University (2022 - 2026)

Bachelor of Computer Engineering

- Made json converter in Python.
- Passed introduction to OOP in Java course.
- Wrote basic compiler in C.
- Explored and practiced lisp languages: SCHEME, Racket, F#, SWI-Prolog.
- Wrote “minesweeper” game in C++ with Qt framework.
- Wrote 3 console Linux-based games in C.

## Experience\projects

### Reqemsal Tehsil (Start-up)

2022 - 2024

Me and my friend started making mobile applications.

Because of lack of experience I chose **Unity Engine** for that purpose, which is, as it turned out, made for making games.

Additionally, I started learning **Google Firebase API** for Unity, which I used in projects below.

### Asta Yol - Sürücülük imtahanı (Ios, Android) 2023

Our first published project, which was minimalistic and simple quiz-based app. Its purpose was to help with preparation for driving license exam with free tests that contained questions of any difficulty level with images.

Result exceeded our expectations, our app was first months top 5 in Azerbaijan. Now, after we left it is still top 10 in education category.

### Stilist - Sənin tərzin (Ios, Android) 2024

Our second published project, which was much more complex in both mechanics and UI parts. This project was about fashion with plenty of clothes combinations of any style( regular, formal, etc..). On main scene we had swipe panel, which I implemented (implementation can be found in my github, I left it public).

## Extracurricular activities

### Music

- I am currently, a pianist of Classical Music Organisation of Boğaziçi University. Every 1-2 months I give a concerto in Albert Long hall.
- This year I started playing organ in Bogazici University.
